SANTHOSH S M

+91 7795154902| Bangalore, Karnataka, India

santhoshsmsanthu0@gmail.com | linkedin.com/in/santhosh-s-m-50a6082a5

Computer Science and Design undergraduate with hands-on experience in front-end and full stack web development. Skilled in HTML, CSS, JavaScript, React.js, Node.js, and MongoDB with the Data Structures and Algorithms. Experienced in building responsive web applications and machine learning projects. Seeking an entry-level Software Developer / React.js Developer role to build scalable and user-focused applications.

Education

BGS College of Engineering and Technology, Bengaluru, Karnataka **2022 - 2026**
Bachelor of Engineering in Computer Science and Design | CGPA - 8.1

Presidency P.U College, Sira, Karnataka **2020 - 2022**
Grade 12 - 84.6%

Mount View Public School, Madhugiri, Karnataka **2019 - 2020**
Grade 10 - 87.6%

Technical Skills

- **Programming Languages:** Python, Java, C
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems (Basics), Computer Networks (Basics)
- **Backend Development:** Python, Node.js, API integration
- **Web Technologies:** HTML5, CSS3, JavaScript, Fetch API
- **Databases:** SQL, Joins, Normalization, MongoDB
- **Machine Learning:** Data Preprocessing, CNN Models, Model Training
- **Tools & Platforms:** Git-Hub, Figma, Canava, Adobe

Objectives

Computer Science and Design undergraduate with strong foundations in **Data Structures** and hands-on experience in **JavaScript, React.js, Node.js, REST APIs, MongoDB, and SQL**. Experienced in building full-stack web applications and machine learning projects. Passionate about building scalable web applications and solving real-world problems using modern technologies.

Projects

Forensic Analysis of Digital Images | Deep Learning
- Built a CNN-based image forensics system using Python to detect AI-generated and manipulated images.
- Implemented data preprocessing, feature extraction, and model training pipelines.
- Improved classification accuracy using hybrid machine learning techniques.

Encryption and Decryption System | Python
- Implemented RSA-based encryption and decryption algorithms to securely convert plaintext into ciphertext.
- Strengthened understanding of cryptography fundamentals and secure data transmission.

Restaurant Website UI/UX Prototype
- Designed and prototyped a fully responsive restaurant website using Figma
- Created intuitive user flows for homepage, menu, about, gallery, and contact sections
- Applied user-centered design principles for optimal digital experience

Web Development Suite: Landing Page, Temperature Converter, Stopwatch | HTML, CSS, Js

- Built a multi-feature web application with responsive landing page
- Implemented temperature converter supporting Celsius, Fahrenheit, and Kelvin
- Developed interactive stopwatch with start, stop, and reset functionality using JavaScript

BMI Calculator Application | Python

- Created a Python application calculating Body Mass Index from user inputs
- Implemented classification logic for Underweight, Normal, Overweight, and Obese categories
- Designed with clean user interface and error handling

Achievements

Academic Distinction

- Secured 6th Rank in 6th Semester among Computer Science and Design students at BGS College of Engineering and Technology

Competitive Programming

- Volunteer Coordinator, Advaya Hackathon – Managed 50+ participants and coordinated activities for smooth event execution
- Participant, NASA International Space Apps Challenge 2024 – Contributed to solving real-world space and Earth challenges

Experience

- Completed Internship in Oasis Infobyte on Python Programming, where I Built Projects Like Landing Page, Portfolio, Temprature Converter, BMI calculator
- Completed Internship in Skill Craft on Web Development, where I Built Immersive Front-end development using HTML, CSS, Js

Certifications

Introduction to Artificial Intelligence	-	Infosys Springboard
Introduction to Data Science	-	Infosys Springboard
Introduction to Deep Learning	-	Infosys Springboard
NASA Space Apps Challenge – Galactic Problem Solver	-	Solving real-world Earth and space challenges
Python Programming	-	Oasis Infobyte
Web Development	-	Skill Craft
AI For All (AI Appreciate Stage)	-	Intel & CBSE
AI For All (AI Aware Stage)	-	Intel & CBSE

Extracurricular Activities

- **NASA International Space Apps Challenge 2024** : Participated in global hackathon solving space and Earth challenges
- **Hackathons & Coding Events** : Regular participant in innovation competitions promoting real-world problem-solving
- **Interests :** Programming, Music, Continuous Learning, Self-discipline practices
